

Sidewall Protections

If the client requests protection against damage, he may opt for additional sidewall panels made out of the following materials:

- Multiplex of 6 or 12 mm
- Polypropylene sandwich-panels of 4mm
- Aluminium perforated-plates of a 2 mm thickness with holes of 8 x 8 mm
- Polyester or ABS panels
- Planking: Pine wood

Options:

- Different colours;
- Protection of the wheel arches;
- Placing protection against the front partition wall;
- Applying an impermeable protective coating;
- Additional illumination;
- Fixing systems;
- A ceiling, existing out of white ABS plating against the roof;
