

Roofrack

For the large van, an entire range of roof-racks is available. These racks are very solid and are hot dip galvanized. This technology provides optimal protection out- and inside. These Roof-racks can easily withstand the maximum roof-load indicated by the vehicle manufacturer;

Roof-rack dimensions:

A1/L1 / L2:	3000 x 1700 mm
A2/L3:	3500 x 1700 mm
A3/L4:	4000 x 1700 mm
A4/L5:	4500 x 1700 mm

Options:

- Roller with two ball bearings
- Access-stair to the tailgate mounted on the rear door;
- Aluminum gang-way mounted on the top of the roof-rack with a width of ± 330 mm

For Box Vans we make roof-racks according to the dimensions of the box.
