

Platforms with shutters

For the Medium Van chassis cab, double cab chassis or cab floor, ACT offers you to install platforms with shutters and dumpers with the following technical specifications:

- Anodised aluminum shutters of 40 cm standard height.
- All metal parts and open openings of shutter and dump platforms are galvanized.
- Roller shutters and roller platforms on request are also hot-dip galvanized.
- They are equipped with plastic guards against mud
- Optionally, we provide stair transport carriers, cabin protection systems, tarpaulins and support systems, etc.

Optionally, the booth's protection and the striking alumina sheet loading surface are provided.
