

Tippers

For the Large Van chassis cab or double cab chassis, ACT can take care of the installation of both standard and adapted tippers, with the following characteristics:

- Standard with anodized aluminum side boards, with galvanized closing systems and hinges and optionally also with steel galvanized side boards.
- Standard hot-dip galvanized or aluminum construction.
- Floor made of galvanized steel, Dur-aluminum or Hardox.
- Plastic mudguards
- Standard with electro-hydraulic control and optionally also with PTO pump.
- Standard with self-opening rear board and optionally also with doors or doors in a self-opening frame
- Standard three-sided tipping, but also single-sided tipping on request
- Standard with 8-ton telescopic cylinder
- Optionally equipped with extended chassis with cabin-box
- Standard with cabin protection
- Optionally we offer ladder supports, tarpaulins, luggage racks, etc.
- Optionally we can paint the tippers and the aluminum tippers can also be anodized.
