

Pick-ups

For the Large Van Chassis Cabin or Chassis Double Cab, ACT can produce and mount pick-ups of both standard and custom sizes depending on the client's wishes, with the following properties:

- Anodized aluminium double wall side boards with galvanized closing systems and hinges
- All those superstructures will be made out of aluminium or hot-dip galvanized steel.
- They are equipped with plastic mudguards and rubber flaps
- Optionally, we provide cabin-protections and long good carriers.

If necessary, we can also offer chassis extension in order to be able to mount longer pick-ups. In some cases, we can even offer you wheelbase elongations.
