

Aluminium ramps

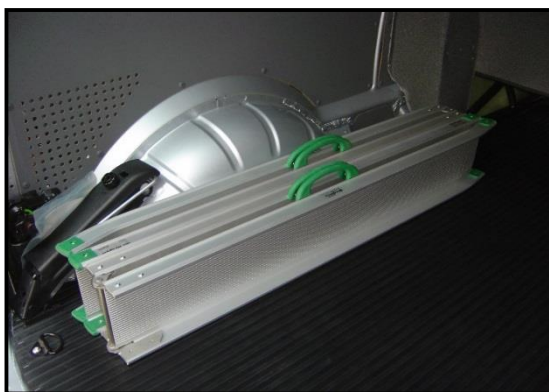

For a multitude of specific activities, a light but tough ramp is an appropriate solution. Here are various possibilities.

Ramps placed by our company can be in the following manners of arrangement:

- Under a raised floor
- On the side of the vehicle, in the upright position
- On a support between the longitudinal members of the chassis of a chassis-cab
- Under the seats of a combi model

Folding ramp

Portable loading ramps from aluminium for small weights
